SAFETY INSTRUCTIONS FOR THE "ACCESSORIES" CATEGORY

1. Introduction

This document outlines safety guidelines and proper use instructions for products in the "**Accessories**" category. This includes items such as **scissors, pruners, sprayers, labels, garden wires, clips, trowels, microscopes, repair tapes, and other small gardening tools**. Following these rules will ensure user safety and protect plants and equipment from damage.

2. General Safety Guidelines

- Store **sharp tools** (scissors, pruners, scalpels) in a safe place, out of reach of children and pets.
- When working with sharp objects, exercise caution to avoid cuts and injuries.
- **Sprayers** should be used according to the manufacturer's instructions, paying attention to the type of liquids being used.
- Ensure all tools are clean and dry after use.

- Do not use damaged accessories, such as broken scissors, corroded pruners, or leaking sprayers.
 - Before using a product, ensure it has clear and complete markings, including user instructions, warnings, and manufacturer contact information.
 - Carefully read the product manual and this safety document to ensure you are using the product as intended by the manufacturer.
 - Check if the product is suitable for the age and skills of its users. Items with sharp edges, cords, or those generating high temperatures must be stored out of reach of children and individuals requiring care.
 - Use the product only for its intended purpose. Any deviation from the instructions may lead to damage or accidents.
 - Pay attention to the risk levels associated with each product. Follow all warnings to prevent injuries or property damage.
 - Regularly inspect and maintain accessories according to the manufacturer's recommendations, especially devices requiring technical servicing.
 - Ensure the product is used in appropriate conditions. Items intended for indoor use should not be used outdoors unless explicitly stated by the manufacturer.
 - For electrical or heating devices, ensure proper ventilation in the area of use.
-

General Precautions

- **Maintaining Cleanliness** – Regular cleaning of products is essential for their safe use. Before and after use, clean all working surfaces with recommended cleaning agents. For electrical devices, disconnect them from the power source and allow them to cool down before cleaning.
 - **Avoid Modifications** – Do not make unauthorized modifications, repairs, or alterations to products. Such actions may compromise safety and damage the product. If repairs are needed, consult an authorized service center or the manufacturer.
 - **Safe Electrical Connections** – For electrical devices, ensure they are connected to outlets with appropriate voltage and are protected from moisture. Never use devices with damaged power cords or plugs. If the power cord is damaged, it must be replaced by the manufacturer, their representative, or a qualified professional to prevent hazards.
 - **Supervise Devices** – Do not leave electrical devices running unattended. Regularly monitor their operation to ensure they are functioning correctly and safely.
-

3. Safety for Scissors and Pruners

- Use tools for their intended purpose, such as scissors for trimming plants, not for cutting thick materials.
- Store tools with blade covers to minimize the risk of cuts.
- After use, clean the tools of plant residues and dry them to prevent rust.

- Regularly sharpen pruners and scissors to ensure safe and efficient cutting.
-

4. Safety for Sprayers

- Before filling the sprayer, ensure it is clean and free of any residue from previous substances.
 - Use only liquids that are safe for plants and humans, following the manufacturer's recommendations.
 - Do not leave pressurized sprayers in the sun or under pressure.
 - After use, empty and rinse the sprayer with clean water.
 - Store sprayers in a dry and safe place, out of reach of children.
-

5. Safety for Labels and Garden Wires

- **Labels** should be attached gently to avoid damaging plant stems.
 - Use **garden wires** with protective coating to stabilize plants, but avoid over-tightening.
 - Store wires and clips in places where they do not pose a risk of tripping or injury.
-

6. Safety for Microscopes and Magnifying Glasses

- Use microscopes and magnifying glasses with LED lighting according to their user manuals.
 - Avoid prolonged exposure to bright LED light to protect your eyesight.
 - Store optical equipment in protective cases to avoid damage.
-

7. Safety for Repair Tapes and Mounting Tools

- Use repair tapes only for their intended purpose.
 - Avoid contact of adhesive tapes with eyes and skin.
 - When using utility knives or scalpels, exercise extreme caution.
 - Dispose of used blades and tape remnants safely and according to regulations.
-

8. Maintenance and Inspection of Accessories

- Regularly check the condition of tools and accessories. Damaged items must be replaced immediately.
 - Scissors, pruners, and sprayers should be cleaned and maintained after each use.
 - Store accessories in dry, well-ventilated areas.
-

9. Emergency Procedures

- In case of cuts or injuries while using tools, immediately treat the wound.
 - Remove damaged or unsafe accessories from use and replace them with new ones.
 - If liquid leaks from sprayers or other accessories, clean the area immediately and ensure the substance does not pose a hazard.
-

10. Final Remarks

Adhering to these guidelines will ensure safe and effective use of gardening accessories. Take care of your health and the condition of your tools and accessories to ensure their long lifespan.

Safety First!
