SAFETY INSTRUCTIONS FOR THE "IRRIGATION ACCESSORIES" CATEGORY

1. Introduction

This document outlines the safety guidelines and proper usage of products in the "**Irrigation Accessories**" category. This includes items such as **garden hoses, sprinklers, watering cans, nozzles, splitters, connectors, drip irrigation systems, and other irrigation tools**. Adhering to these guidelines ensures user safety and prevents damage to equipment.

2. General Safety Guidelines

- Store **irrigation accessories** in a dry and clean place, away from heat sources and direct sunlight.
- Ensure all products are properly connected and sealed before starting operation.
- **Connectors and splitters** should be installed according to the manufacturer's instructions to avoid leaks or damage.

- Do not use damaged hoses, sprinklers, or other irrigation accessories.
 - Before first use, check that the product has **clear and complete markings**, such as instructions for use, warnings, and manufacturer information.
 - Carefully read the user manual and this document to ensure correct product usage.
 - **Avoid overloading** irrigation systems by using the appropriate water pressure and flow rate.
 - Ensure the product is **suitable for the environment and users**. Do not allow children to use accessories unsupervised.
 - **Handle water carefully** – avoid contact of irrigation systems with electrical installations or devices under power.
 - Regularly perform **maintenance and inspections** of irrigation accessories to ensure they are in good technical condition.
 - Ensure the products are used only under conditions specified by the manufacturer.
-

General Precautions

- **Maintaining Cleanliness** – Regularly clean irrigation accessories to prevent the buildup of dirt and limescale. Before storage, make sure hoses and sprinklers are dry.
 - **Avoid Modifications** – Do not carry out unauthorized repairs or modifications on connectors, splitters, or other accessories. Replace damaged parts with original components.
 - **Safe Connections** – Ensure accessories are connected to water systems with appropriate pressure. Excessive pressure can damage equipment.
 - **Frost Protection** – Before winter, empty water from irrigation systems and store them in a dry place to prevent cracks.
 - **Safe Operation** – Ensure that sprinklers and drip systems are placed on stable surfaces to avoid accidental tipping.
-

3. Safety for Hoses and Connectors

- Before use, check that hoses and connectors are tight and free from damage.
 - Do not drag hoses over sharp edges or crush them with heavy objects.
 - Regularly inspect hoses and connectors. Replace damaged components immediately.
 - Ensure hoses do not pose a tripping hazard during operation.
-

4. Safety for Sprinklers and Irrigation Systems

- Place sprinklers and irrigation systems on stable surfaces to avoid tipping during operation.

- Keep drip irrigation systems clean to prevent clogging of tubes.
 - Do not use sprinklers near electrical devices or power sources.
 - Monitor water flow and pressure to ensure efficient and safe irrigation.
-

5. Safety for Watering Cans and Hand Tools

- When filling watering cans, avoid overfilling to prevent water spillage.
 - Store watering cans and hand tools in a dry place to avoid damage.
 - Regularly clean watering cans and tools to prevent limescale buildup and contamination.
-

6. Maintenance and Inspection of Irrigation Accessories

- Regularly inspect the condition of hoses, sprinklers, connectors, and other irrigation components.
 - Replace damaged accessories immediately with original parts recommended by the manufacturer.
 - Drain and dry accessories before prolonged storage, especially during winter.
 - Clean drip irrigation systems according to the manufacturer's guidelines to ensure proper operation.
-

7. Emergency Procedures

- In the event of a water leak, immediately disconnect the water supply and address the cause of the failure.
 - Replace damaged or leaking components to prevent further issues.
 - If electrical devices are flooded, immediately disconnect them from power and contact technical support.
-

Final Remarks

Following these instructions will ensure the safe and effective use of irrigation accessories. Take care of your safety and the condition of your tools to guarantee their longevity.

Safety First!
