SAFETY INSTRUCTIONS FOR THE "OTHER DEVICES" CATEGORY

1. Introduction

This document outlines the safety guidelines and proper use of products in the "**Other Devices**" category. This includes items such as **mechanical, manual, lighting, measuring, and multi-functional tools**. Following these guidelines ensures user safety and long-term efficient operation of devices.

2. General Safety Guidelines

- Store **devices** in a dry, well-ventilated place, away from moisture and heat sources.
- Before first use, ensure that the product is complete, free of damage, and operates correctly.
- **Do not use damaged devices** – they can pose a safety hazard.
- Carefully read the user manual and follow all manufacturer warnings.
- Use devices according to their intended purpose and technical specifications.

- Do not leave operating devices unattended.
 - Store devices out of reach of children and unauthorized users.
-

General Precautions

- **Safe Operation** – Ensure the device is stable during operation and used as instructed.
 - **Damage Prevention** – Avoid subjecting devices to mechanical impacts, overloading, or extreme conditions.
 - **Cleaning** – Clean devices after each use following the manufacturer's recommendations.
 - **Avoid Modifications** – Do not perform unauthorized repairs or modifications to devices.
 - **Work Safety** – Use appropriate personal protective equipment, such as gloves or safety goggles, when required.
-

3. Safety for Manual and Mechanical Devices

- Ensure all moving parts of the device are functional and stable.
 - Before starting, verify that the device is properly assembled.
 - Regularly lubricate and maintain mechanical components as per the manufacturer's instructions.
 - Avoid contact with moving parts during device operation.
-

4. Safety for Lighting Devices

- Use lighting devices according to the recommended voltage and specifications.
 - Do not cover operating lamps to prevent overheating.
 - Keep light sources away from flammable materials.
 - Replace damaged bulbs or components with original parts from the manufacturer.
-

5. Safety for Measuring and Multi-Functional Devices

- Ensure measuring devices are operational and free of damage before use.
- Use devices strictly for their intended purpose and in appropriate conditions.
- Store devices in secure locations to protect against moisture and mechanical damage.

6. Maintenance and Inspection of Devices

- Regularly check the technical condition of devices and their components.
- Clean devices using mild detergents and soft materials.
- Replace worn or damaged parts with original components recommended by the manufacturer.
- Store devices in dry locations to prevent corrosion and damage.

7. Emergency Procedures

- If a device malfunctions, stop using it immediately.
- Disconnect electrical devices from the power source.
- Take damaged devices to an authorized service center for repairs.
- If injuries occur during device operation, provide first aid and contact emergency services.

Final Remarks

Following these guidelines ensures safe and effective use of devices and accessories. Perform regular maintenance and monitor the technical condition of the products.

Safety First!
