# SAFETY INSTRUCTIONS FOR THE "ACIDS/BASES" CATEGORY

## 1. Introduction

This document outlines the safety guidelines and proper use of products in the **"Acids/Bases"** category. This includes items such as **acidic solutions, alkaline solutions, and chemical concentrates for specialized applications**. Following these guidelines ensures user safety and minimizes risks associated with handling these substances.

---

## 2. General Safety Guidelines

- Store **acids and bases** in their original, tightly sealed containers, in cool, dry areas away from heat sources.
- Use products strictly as intended and follow the manufacturer's instructions.
- Before use, read the product's safety data sheet and warning label.
- **Do not mix acids with bases or other chemicals** unless explicitly recommended by the manufacturer.

- Work in a well-ventilated area or use respiratory protective equipment.
  - Keep products out of reach of children and pets.
- 

### 3. Personal Protective Equipment (PPE)

- **Eye Protection** – Use safety goggles or face shields to prevent contact with eyes.
  - **Skin Protection** – Wear chemical-resistant gloves and protective clothing to minimize burn risks.
  - **Respiratory Protection** – Use masks with appropriate filters in case of chemical vapors.
- 

### 4. Safe Handling of Products

- When pouring or mixing solutions, proceed carefully to avoid splashes.
  - Never add water to concentrated acids – always add acid to water to prevent violent reactions.
  - Use only appropriate tools and containers resistant to acids and bases.
  - In case of spills, immediately apply neutralizing agents and clean the area thoroughly.
- 

### 5. Maintenance and Storage

- Store products in well-labeled containers, away from food and flammable materials.
  - Regularly inspect containers and seals – damaged containers must be replaced immediately.
  - Store acids and bases separately to prevent accidental mixing.
- 

### 6. Emergency Procedures

- **Skin Contact** – Rinse the skin immediately with plenty of water for at least 15 minutes and seek medical attention.
- **Eye Contact** – Rinse eyes under running water for at least 15 minutes and immediately consult a doctor.
- **Inhalation of Vapors** – Move the affected person to fresh air and keep them calm. Call for medical help if needed.
- **Ingestion** – Do not induce vomiting. Contact a doctor and provide product label information.

---

## Final Remarks

Following these guidelines ensures safe and effective use of acidic and alkaline products. Use appropriate personal protection and store products as recommended by the manufacturer.

**Safety First!**
