# **SAFETY INSTRUCTIONS FOR THE "SEEDS" CATEGORY**

## **1. Introduction**

This document outlines the safety guidelines and proper use of products in the "Seeds" category. This includes items such as vegetable seeds, herb seeds, flower seeds, hydroponic seeds, and specialty seeds. Following these guidelines ensures user safety and optimal germination and plant growth.

---

## **2. General Safety Guidelines**

- **Store seeds in a dry, cool, and dark place to prevent premature germination and maintain quality.**
- **Do not consume seeds intended for sowing – they may have undergone special treatments or coatings.**
- **Use seeds according to the manufacturer's instructions, maintaining proper sowing depth and spacing.**

- Avoid contact with treated seeds on skin, eyes, and respiratory system – they may contain chemical substances.
  - Keep seeds out of reach of children and pets.
- 

### **3. Precautions During Use**

- Choosing the Right Soil – Use soil suitable for the seed type, ensuring good water retention and aeration.
  - Watering – Avoid overwatering to prevent seed rot and mold development.
  - Germination Temperature – Maintain the appropriate temperature conditions for each plant species.
  - Careful Handling – Avoid mechanical damage to seeds during sowing.
  - Labeling – Mark planted seeds to prevent misidentification of plant varieties.
- 

### **4. Maintenance and Storage**

- Store seeds in original packaging or airtight containers to protect them from moisture and pests.
  - Do not store seeds near chemicals, which may affect their germination ability.
  - Dispose of expired seeds and used packaging according to local organic waste disposal regulations.
  - Regularly check seed expiration dates – older seeds may have lower germination rates.
- 

### **5. Emergency Procedures**

- Skin Contact – If handling treated seeds, wash skin thoroughly with soap and water.
  - Eye Contact – Immediately rinse eyes with plenty of water for at least 15 minutes and seek medical attention.
  - Ingestion – If seeds are accidentally swallowed, consult a doctor and provide product details.
  - Germination Issues – If seeds fail to germinate as expected, check sowing conditions, moisture, and temperature.
- 

### **Final Remarks**

**Following these guidelines ensures safe and effective use of seeds, resulting in healthy and strong plants. Regularly monitor storage conditions and ensure quality soil and water are used for irrigation.**

**Safety First!**
