SAFETY INSTRUCTIONS FOR THE "IRRIGATORS" CATEGORY

1. Introduction

This document outlines the safety guidelines and proper use of products in the "**Irrigators**" category. This includes items such as **drip irrigation systems, sprinklers, micro-sprinklers, drip lines, nozzles, hoses, and other irrigation devices**. Following these guidelines ensures user safety and the long-lasting, efficient operation of the products.

2. General Safety Guidelines

- Store **irrigators** in a dry place, away from frost and extreme temperatures.
- Install irrigation systems according to the manufacturer's instructions to ensure proper operation.
- Before starting the system, ensure all components are securely connected and leak-free.

- **Do not use damaged hoses, sprinklers, or drip lines**, as they may cause leaks and water loss.
 - Keep devices out of reach of children and pets to prevent accidental damage.
 - Ensure that water pressure does not exceed the limits specified by the manufacturer.
-

3. Precautions During Use

- **System Installation** – Install systems on stable surfaces to prevent movement during operation.
 - **Damage Prevention** – Avoid dragging hoses over sharp edges or crushing them.
 - **Irrigation Needs** – Position sprinklers and drip lines according to plant requirements to avoid water overuse.
 - **Leak Control** – Regularly check the system for leaks or loose connections.
 - **Cleaning** – Clean nozzles and filters regularly to prevent clogging and ensure proper water flow.
-

4. Maintenance and Storage

- At the end of the irrigation season, drain the system to prevent frost damage.
 - Store hoses, sprinklers, and drip lines in their original packaging or a dry location.
 - Regularly clean system components with gentle cleaning agents to remove deposits and dirt.
 - Replace damaged components with original parts recommended by the manufacturer.
-

5. Emergency Procedures

- In case of hose rupture or water leakage, immediately shut off the water supply and replace the damaged part.
 - If nozzles or filters become clogged, clean them according to the manufacturer's instructions.
 - Repair the system before restarting to prevent water loss and ensure proper function.
-

Final Remarks

Following these guidelines ensures safe and effective use of irrigation devices. Regularly inspect and maintain systems to ensure long-lasting functionality.

Safety First!
