# SAFETY INSTRUCTIONS FOR THE "PROTECTIVE EQUIPMENT" CATEGORY

## 1. Introduction

This document outlines the safety guidelines and proper use of products in the "**Protective Equipment**" category. This includes items such as **protective gloves, masks, safety goggles, protective clothing, and other safety accessories**. Following these guidelines ensures maximum protection and user safety during operation.

---

## 2. General Safety Guidelines

- Use **personal protective equipment** (PPE) according to its intended purpose and manufacturer's recommendations.
- Store protective products in a dry, well-ventilated place, away from heat sources and chemicals.
- Before use, ensure products are free of damage. Replace any items showing cracks, tears, or other defects.

- **Do not share protective equipment** – PPE is intended for individual use.
  - Regularly clean and disinfect protective equipment according to the manufacturer's instructions.
- 

### 3. Precautions During Use

- **Protective Gloves** – Select the appropriate type of gloves for the task (e.g., chemical-resistant, cut-resistant).
  - **Protective Masks** – Ensure the mask fits properly and provides effective air filtration.
  - **Safety Goggles** – Use goggles with appropriate filters to protect your eyes from sparks, dust, or harmful radiation.
  - **Protective Clothing** – Wear clothing suited to the working environment, ensuring full body coverage and protection against injuries.
  - Replace protective equipment when worn out or after single use if designed for disposable use.
- 

### 4. Maintenance and Storage

- Regularly check the technical condition of protective equipment.
  - Clean products according to the manufacturer's recommendations – avoid using harsh chemicals that could damage the material.
  - Store protective equipment out of reach of children and away from flammable materials.
  - Dispose of single-use items in accordance with local waste regulations.
- 

### 5. Emergency Procedures

- **Damaged Protective Equipment** – Immediately replace damaged items with new ones.
  - **Chemical Contact** – If chemicals penetrate gloves or clothing, immediately remove the affected equipment and rinse the skin with plenty of water.
  - **Mask Filtration Failure** – Stop work and replace the filter or mask.
  - **Eye Injuries** – In case of eye contamination, rinse thoroughly with water for at least 15 minutes and seek medical attention.
- 

### Final Remarks

Following these guidelines ensures safe and effective use of protective equipment. Regularly check the condition of the products and replace worn components as recommended by the manufacturer.

**Safety First!**
