# SAFETY INSTRUCTIONS FOR THE "LIGHTING" CATEGORY

## 1. Introduction

This document outlines the safety guidelines and proper use of products in the "**Lighting**" category. This includes items such as **lamps, bulbs, lighting systems, power supplies, reflectors, and lighting accessories**. Following these guidelines ensures user safety and efficient product operation.

---

## 2. General Safety Guidelines

- Before use, carefully read the product manual and specifications provided by the manufacturer.
- Ensure the electrical installation meets all safety requirements before connecting lighting devices.
- **Do not use damaged cables, bulbs, or other components** – this may lead to short circuits and fire hazards.

- Install lighting products according to the manufacturer's recommendations to ensure stability and proper operation.
  - Store light sources and power supplies in a dry, cool place, away from moisture and high temperatures.
  - Ensure all connected devices match the appropriate power supply voltage.
- 

### 3. Precautions During Use

- **Lighting Installation** – Perform installation work only after disconnecting the electrical power supply.
  - **Overheating Prevention** – Ensure proper ventilation for lamps and power supplies to prevent overheating.
  - **Safe Bulb Replacement** – Before replacing bulbs, ensure the device is disconnected from power and has cooled down.
  - **Stable Mounting** – Ensure all lighting components are securely mounted to prevent falling.
  - **Caution During Use** – Avoid touching hot bulbs or lamps while the device is in operation.
- 

### 4. Maintenance and Storage

- Regularly clean lighting components with a soft cloth to maintain maximum light output.
  - Avoid using harsh cleaning agents that may damage lamp and reflector surfaces.
  - Store products in their original packaging or in secure locations to prevent mechanical damage.
  - Regularly inspect cables and electrical connections. Replace damaged components with original parts recommended by the manufacturer.
- 

### 5. Emergency Procedures

- **Lighting Failure** – Immediately disconnect the power supply and inspect the device for faults.
- **Overheating** – Turn off the device and allow it to cool. Check ventilation and component condition.
- **Electrical Short Circuit** – Disconnect the power source and contact a qualified technician.
- **Damaged Bulb or Lamp** – Safely remove glass fragments to avoid injury and replace the light source with a new one.

---

## **Final Remarks**

Following these guidelines ensures safe and effective use of lighting systems and accessories. Regularly inspect the technical condition of products and perform proper maintenance to achieve maximum performance.

**Safety First!**
